

DYNAMO ULTRA® ALL-IN-ONE OCTANE BOOSTER

DU-AIO-OB

Product Data Sheet

Performance Technology

Multifunctional High-Performance Gasoline Fuel Treatment Additive

DYNAMO ULTRA® All-In-One Octane Booster is a high-performance multifunctional Gasoline Treatment Additive create High-Performance | High-Octane Gasoline Fuel. Its chemical components have been rigorously evaluated in both modern GDI & PFI engines, providing optimal protection against all deposit formation in all fuel injected engines, reducing emissions while restoring lost fuel economy, power & acceleration, cleaning & protecting while improving overall engine performance. Increased thermal efficiency burn via Catalyst & Atomizing Agents!

For Use In:

- All Gasoline Powered Engines
- GDI & PFI Engines (Gasoline Direct Injection & Port Fuel Injection Engines)
- Lawnmowers & Lawn Equipment
- Cars, Race Cars, Sport Utility Vehicles, Trucks & Light Trucks, Motorcycles, Recreational & Sport Vehicles, Military Vehicles, Farm Equipment, Boats (Plus)

Application

At Recommended Treat Rate of 640:1, DYNAMO ULTRA® AIO-Octane Booster Provides the following Performance Improving Benefits:

- Creates High-Performance High-Octane Fuel
- Boosts MPG, Restores Power & Acceleration.
- Catalyst Agents increase Octane: ≤ 5-points.
- Increased BTUs & Combustion - Optimized Thermal Burn Efficiency. (Fuel Atomizers)
- Concentrated Friction Modifier Package Provides Superior Wear Protection.
- Protection; Cleans & Removes up to 100% of Performance Robbing Deposits and Prevents Future Deposit(s) Formation in the Combustion Chamber while Preventing Injector & Intake Valve Fouling.
- Reduces Cost of Maintenance & Downtime
- Reduces Exhaust Emissions, more Environmentally Friendly.
- Fuel Stabilizers Inhibit Gum Formation & Provide Thermal and Oxidative Stability, Lubricity, Corrosion Protection and Water Dispensancy. *Increased Induction Period!*
- Corrosion Inhibitors & Friction Modifiers work on a Molecular Level with Surface Active Chemistry & Long-Chain Molecules, approved under Military Specifications.
- Extends the Life of Your Engine!

Additional Information

DYNAMO ULTRA® AIO Octane Booster may be Continuously, or Batch Blended.

Dosing Systems

CyberFuels™ Inc. offers Tank Farm / Bulk Storage Injection Dosing System Options.

Material Compatibility

DYNAMO ULTRA® AIO Octane Booster is compatible with all gasoline internal combustion engine's materials of construction.

CyberFuels™ has treated more than 70M gallons of fuel with no adverse issues.

EPA Registration

NO. 273620001
 40CFR79.23 Compliant
 40CFR80.591 Compliant
 LEGAL GASOLINE OB Additive
 Not intended for use in diesel fuel

Personal Safety, First Aid and Storage and Handling

See MSDS for full product specifics. Ideal Storage Conditions: Indoor clean, dry, ambient temperature, well ventilated. Keep away from heat, sparks & flame. Use spark-resistant tools.

Outdoor Storage: Avoid direct sunlight, store in cool well-ventilated place. Keep container closed when not in use.

Typical Properties

Appearance.....	Semi-Clear Amber Liquid
Physical State.....	Liquid
Density, lbs./gal 65°F (18.3°C).....	6.94
pH.....	8.2
Pour Point, °F (°C).....	<-40 (<-86)
Flash Point, °F (°C).....	~25 (~-3.9)
